The Clinton Smelter/Magnet Mills (Clinton Smelter) site is located in Clinton, Anderson County, Tennessee. The operated as a lead and zinc smelting operation and then subsequently as a hosiery mill from 1906 to 1967. Tetra Tech was tasked to conduct a removal assessment (RA) at the Clinton Smelter site, including attending a smeeting with the Task Monitor, Level B personal protective equipment (PPE) sampling of unknown drums, Level D PPE sampling of soil, utilization of a Niton x-ray fluorescence analyzer to screen surface soils, procurement laboratory services, and providing written and photographic documentation of site conditions and activities. To was also tasked to prepare a health and safety plan, a cost estimate, and RCMS 1900-55s. During RA activities, Tetra Tech collected three waste samples from drums containing transformer oil and analy PCBs; two samples from suspected drums of flammable liquids for flash point analysis; and a soil sample from previously excavated areas adjacent to Transformer Pads 1 and 2 to ensure that no PCBs remained. All sampling activities and avalatical results are surrous in the first PA report dated Avantat 10, 2009						sill from 1906 to 1967.
